

FILTER ELEMENT CG-ULTRA

FOR SURVIVAL PRESS
WATER FILTER 500 ML

www.aqualogicfilters.com

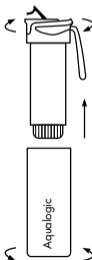

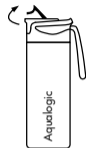

HOW TO USE (1/2)

Prepare

Open the drinking spout on top of the lid.

Remove the Outer Bottle

Firmly hold the lid with one hand and the outer bottle with the other. Pull the inner bottle gently out of the outer bottle. Apply even pressure and avoid pulling too quickly to prevent damage. Always ensure that the filter element is firmly attached to the bottom of the inner bottle.

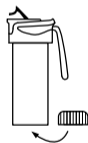

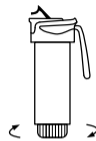

HOW TO USE (2/2)

Remove the Filter Element

Twist the filter element counterclockwise and gently pull it downward to detach it from the inner bottle.

Replacement

Take the new element and attach it firmly to the bottom of the inner bottle.

PRODUCT DETAILS

Lid (with drinking opening)

Inner Bottle

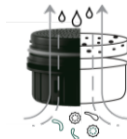

Filter Element

Outer Bottle

Two Stage Filter Element

- Ultra filtration membranes
- Activated carbon filter

Filter characteristics

The AQUA Logic Survival Press Water Filter operates using water pressure, where force is applied to push water from the outer bottle through the filter and into the inner bottle.

This filter features the AQUA Logic CG-Ultra water filter element, which combines Ultrafiltration Membranes and Activated Carbon Granulate for effective filtration.

The Activated Carbon Granulate, made from organic coconut shell material, offers a high adsorption capacity. It efficiently adsorbs odors, color, and taste, as well as metals such as lead, yeasts, chlorine, pharmaceutical residues, and other harmful chemicals.

Ultra filtration membranes with a pore size of 0.02 microns, providing effective filtration against:

- Pathogenic organisms: Bacterial reduction of >99.9999% (including Cholera, Shigella, Typhus, Klebsiella terrigena, Legionella, and E. coli)
- Cysts/Protozoa: (including Giardia and Cryptosporidium)
- Micro- and Nano-plastics: Removes particles as small as 0.02 microns.
